Talk About Good Bread

why, Buster Brown Bread is so good that once you taste it you will want it always. It ought to be good, too, because it is made of the best ingredients in the world, mixed accurately to the smallest fraction and made by expert bakers with the best modern equipment. No house in the land has such splendid facilities for making bread and, therefore, cannot make such perfect bread. Every woman owes it to herself and her family to quit baking bread in a hot kitchen. Buster Brown Bread is cheaper and better than she can bake. Take no other.

WHY FAMOUS PASTRY COOKS USE K C BAKING POWDER

The patrons of our first class hotels and restaurants are exacting—they demand the best. Women go where the pastry and cakes are noted for their excellence. Men are attracted by hot bread and biscuits—when fresh and moist and light.

The pastry cook with a reputation uses K C Baking Powder because he knows that results are certain; every time everything is as good as his best.

Then, too, with K C Baking Powder he can mix the various kinds of batter before the rush of the meal begins and bake as needed so that every order goes to the table fresh and hot, yet the last he bakes are just as good as the first.

The reasons behind these reasons is that K C is really a blend of two baking powders. One commences to give off leavening gas as soon as moistened. The other requires both moisture and heat to make it active. Dough or batter will remain in a partially leavened condition for hours, and when put in the oven, will come up as light as if mixed a moment before.

For cookies, pancakes, doughnuts and the like, which cannot all be baked at once, K C is indispensable. For all baking the double raise makes doubly certain.

Follow the example of the professional cook and your baking will be equal to his.
